

June 4, 2024

Dear Town of Kill Devil Hills Board of Commissioners,

The Community Care Clinic of Dare (CCCD) is the first integrated medical-dental-pharmacy healthcare facility dedicated to serving adults without affordable health insurance who live/work in Dare County. This fiscal year the CCCD opened its dental clinic, providing primary dental care to qualified individuals at a reduced cost compared to traditional dental clinics. The CCCD also opened a pharmacy in fiscal year 2023/2024, providing affordable maintenance medications, i.e. diabetic and blood pressure, that many patients could not access due to cost at commercial pharmacies. We offer mental health medications and now have virtual mental health providers.

CCCD is sustained through individual/business donations, county and local government contributions, State grants, foundations, and fundraising events. We are so grateful for your support as our budget has increased with each new service line.

This contribution to the Community Care Clinic of Dare reduces overall health care costs to the community. Providing care for acute and chronic conditions alleviates overuse of the Emergency Department and helps prevent poor outcomes. We also offer cancer screenings, lab work, MRI/CT, referrals to specialists, diagnostics, and mental health providers. Patients with diabetes receive diabetic retinal eye screenings with our EYENUK retinal camera, and if necessary, are referred immediately to Wagner Retina and Macula Specialist for treatment to prevent vision loss.

As the only Syringe Services Program in the county, CCCD is contributing to harm reduction of substance use. CCCD now offers Vivitrol, an injectable medication to treat opioid and alcohol use disorder. Vivitrol suppresses the craving for these substances, and paired with counseling, it supports the individual to become completely drug-free.

Our health educators and nurse navigators assess all patients for social determinants of health including food, clothing, shelter, personal safety, transportation, employment, substance use, etc. Closed loop referrals to local resources ensure our patients receive the support they need.

I welcome you to come for a visit, a tour, and meet our staff and volunteers.

Warmest regards,

*Lyn Jenkins*

Lyn Jenkins, RN BSN
